Drawing

☐ Start with simple shapes: Teach children to break down objects into basic shapes like circles, squares, triangles, and rectangles. This will help them understand the structure of the subject they are drawing.

☐ Use light guidelines: Encourage children to lightly sketch guidelines on their paper before starting a drawing. These guidelines will help them maintain proportions and ensure that their final drawing looks more accurate.

☐ Practice observation skills: Teach children to observe their subjects carefully and pay attention to details like shapes, lines, and textures. Encourage them to draw what they see, not what they think they see.

☐ Start with pencil: Begin by teaching children to draw with pencils rather than other art mediums. Pencils are forgiving and allow for erasing, making it easier for children to correct mistakes and improve their drawings.

☐ Start from the background: Teach children to start drawing from the background and work their way forward. This will help them understand the concept of foreground, middle ground, and background and create a sense of depth in their drawings.

☐ Focus on shading: Teach children the basic techniques of shading, such as hatching, cross-hatching, and blending. Shading adds dimension and depth to drawings, making them more realistic.

☐ Encourage creativity: Give children the freedom to experiment and explore their own artistic style. Encourage them to think outside the box and create unique interpretations of their subjects.

☐ Provide constructive feedback: When children finish their drawings, offer constructive feedback to help them improve. Praise their efforts and point out specific areas for improvement, such as proportions or details.

☐ Keep it fun: Make art lessons enjoyable by incorporating games, challenges, or storytelling into the process. This will keep children engaged and motivated to learn and practice their drawing skills.

Chrome Extensions

1. Todoist

Todoist is the best to-do list app of choice, and the Chrome extension speeds up the process of adding tasks (including adding websites as tasks).

2. LinkCollect

Build your second brain online and save every link that matters in a well-organised way.

3. Taplio X

Get to know your LinkedIn stats and the viral content on anyone's profile using Taplio X.

4. Tweet Hunter X

This extension enhances your Twitter usage and guides you to the best content.

5. Notion Web Clipper

Save any website or resource into your Notion database.

6. VidIQ vision for YouTube

This extension helps you uncover the secrets to success behind your favorite YouTube videos and channels.

7. AIPRM For ChatGPT

AIPRM is your cheat code for ChatGPT as it adds a list of curated prompt templates and advanced features.

8. Textblaze

An extension to help you type fast as a knowledge worker.

9. Workona Spaces And Tab Manager

The world's favorite tab manager.

10. Huntr

Collect, track, and manage your job applications from across the web. Apply and autofill job applications in one click.
